- Line in cable: RCA jacks, 9 feet long (3 meters)
- AC power cable
- External FM wire antenna

Optional accessories

- Floor stand in aluminum finish. Weight: 29 pounds (13 kg)

Overview:

The Geneva Sound System model L is a complete stereo system, crafted in a single cabinet made out of piano lacquered wood. Considering its compact size, the sound performance is remarkable, from a deep bass to crystal clear highs. It is a very versatile system that plays all genres of music very well and can support a relatively large room size. Your music will sound better than ever. Model L features an iPod Universal Dock compatible with iPod® models with dock connectors (including, iPod video, iPod nano, iPod photo and iPod mini) a built-in slot-loading CD (that also plays CD-ROM with MP3 files) and a FM radio with digital tuner and presets. All controlled with the included remote. It also connects to other MP3 players, vinyl, TV or any audio with using the enclosed audio and line-out (RCA) cables. The system is powered by a very high quality digital amplifier delivering 100 Watts of high-end digital stereo. It uses the same patented EmbracingSound™ professional sound technology as model XL. It has a LED display visible under the front cover showing input and track playing. This model comes with rubber feet. An optional floor stand in aluminum is available for this model.
