Dave Perewitz Chooses Lincoln

Perewitz Cycle Fabrication, Bridgewater, MA

This legendary cycle builder and founding Hamster motorcycle club member has been building custom bikes for over 30 years. He opened Perewitz Cycle Fabrication in 1974. Dave enjoys building practical, one-of-a-kind custom bikes that are meant to be “art in motion.”

Perewitz has developed a long list of accolades from the industry. He was inducted into the Sturgis Motorcycle Museum and Hall of Fame and the National Motorcycle Museum and Hall of Fame. Easyriders Magazine/V-Twin Magazine named him the 2003 Best Custom Fabricated Bike Builder and recently presented him with the Life Time Achievement Award.

Dave has appeared on the Discovery Channel's® Great Biker Build-Off® series, and his bikes have graced the covers of Easyrider® and Hot Rod Bike®. Perewitz gained national attention for high profile motorcycles such as those created for Aerosmith guitarist Brad Whitford, NASCAR driver Kyle Petty, and NFL player Ruben Brown.

Every step of building a custom motorcycle, from welding to painting, is done at Dave's new 12,000 square-foot facility in Bridgewater, Mass. It's outfitted with Lincoln welding and cutting equipment, including the Precision™ TIG 275, Invertec® V205-T, SP-135 Plus and Pro-Cut® 55.

“I love my Lincoln welder like a fat kid loves cake. Lincoln welders are user friendly, and with our work load, we need all the friends we can get.”
